***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-24, drawn to devices for removing cytokines, classified in class 435, subclass 283.1.
- II. Claims 25-28, drawn to methods of treating blood, classified in class 435, subclass 2.
- III. Claims 29-32, drawn to methods for treating sepsis, classified in class 435, subclass 2.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and III & I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be used in a materially different process of treating blood as claimed, or alternatively can be used to treat sepsis, also as claimed. Furthermore, the method of treating sepsis has long been practiced in the art via the administration of antibiotics.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
